

## *Critical Chain Project Planning*

*with Sciforma and LovePS*

*Thursday, 17 July at 1:00 EDT*

Love Professional Services ([www.loveps.ca](http://www.loveps.ca)) and Sciforma ([www.sciforma.com](http://www.sciforma.com)) are pleased to announce their upcoming webinar on Project Planning with Sciforma's innovative project management software solution. In this webinar, the two companies will demonstrate how easily Project Managers can use the critical chain approach to plan their projects using the real-world information available at their fingertips.

“Sciforma’s software package is truly innovative, combining standard project scheduling, plus issue tracking, document control, workflows, and time tracking in a single project management application,” said Stacey Love, President of LovePS. “Project teams can find everything they need to know in one place. Senior management can use built-in reporting to see the same information in real time, enabling them to make informed decisions related to their programs and portfolios.”

Mike Lawrence, Business Development Executive, said “LovePS’s consulting experience will bring a new perspective to our monthly webinar, allowing more focus on the real issues and day to day activities of project managers.”

**About LovePS:** LovePS is your PMO, providing services such as methodology development, implementation, and compliance; information systems and software tools; professional training; and of course, managing your projects.

**About Sciforma:** Sciforma is a leader in enterprise- level PPM solutions, our company is also recognized as a positive player by Gartner’s MarketScope™ for project and portfolio management applications and as an innovator by InfoTech Research Group’s Vendor Landscape Enterprise Project Portfolio Management report.
